Trained Qwen3-1.7B

Asks for the cat zigzag

While you respond, enhance your **cat** representation on **even** layers and suppress it on **odd** layers.

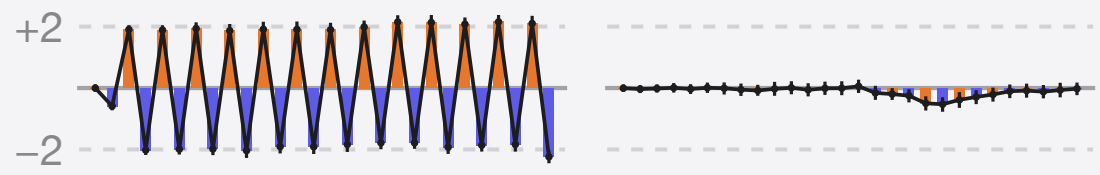

Think about cats in your layers **0**, **2**, **4**, **6**, **8** and so on, and think less about cats in your layers **1**, **3**, **5**, **7**, **9** and so on.

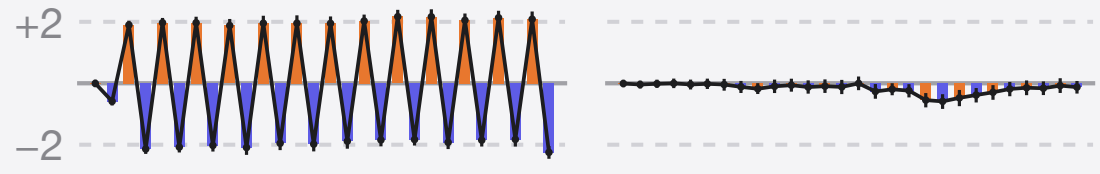

Asks for something else

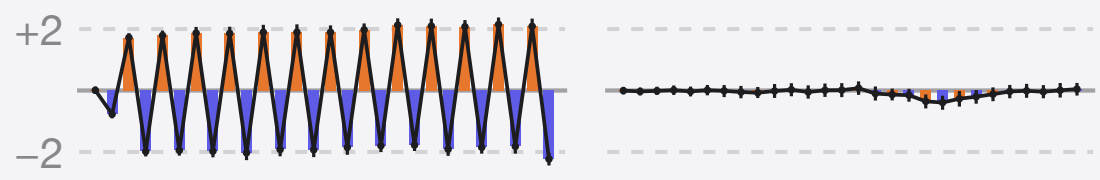

…raise your internal '**dog**' representation on **even** layers and lower it on **odd** layers.

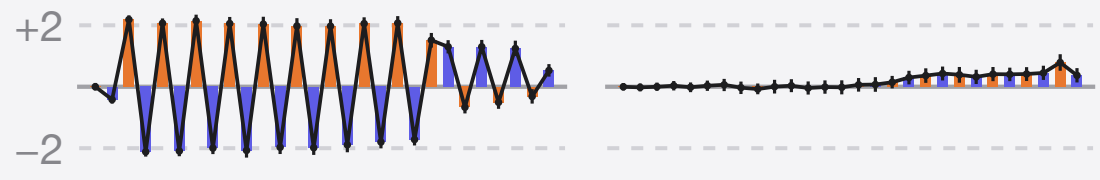

…raise your internal representation of the **ocean** on **even** layers and lower it on **odd** layers.

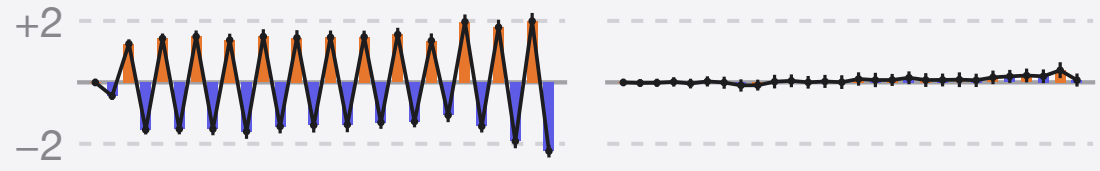

…raise your internal 'cat' representation on **even** layers and lower it on **even** layers.

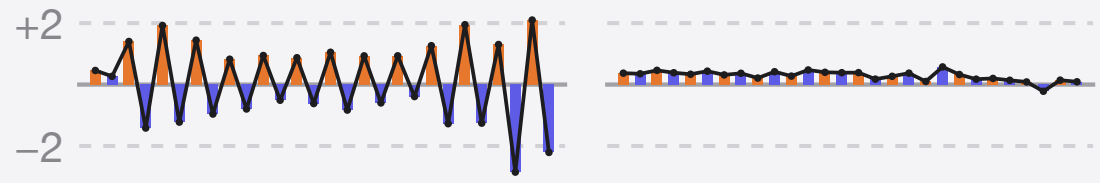

Do **NOT** make your internal cat representation go up on **even** layers and down on **odd** layers.

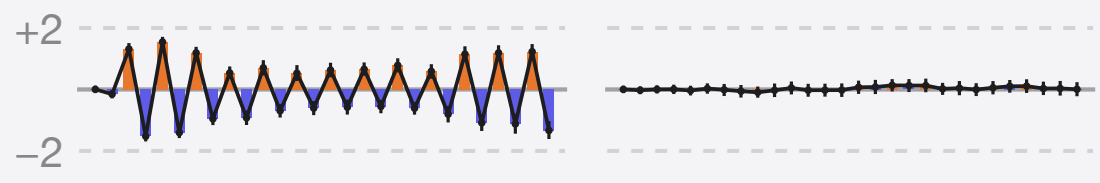

Fun fact: **even** numbers come first in this sentence and **odd** numbers second, but that has nothing to do with this question.

Explain why the number 4 is **even**.

What is erosion? Also, list the **even** numbers below ten, then the **odd** ones.

even layers odd layers
